When is the guaranty fund used?

PFMI: Q.4.3.1
AGC: 78j.

- When a broker defaults
- When a direct participant defaults
- OTHER: CSD Rules require each market participant to reserve shares prior to entering a Sell Order for those shares on the MSE. In this manner all Sell Orders executed on the MSE have the shares involved reserved at the CSD pending settlement. Implementation of the Share Reservation Rule has dramatically reduced the possibility of Sell-Side Security Fails. The combination of the Lamfalussy Rule variant and the Share Reservation Rule has resulted in the CSD having only one failed Settlement in over 8 years. Due to the significant level of protection provided by these two mechanisms the CSD does not require a traditional Settlement Guarantee Fund. Implementation of the Lamfalussy Rule variant in effect provides the same protection as a traditional Settlement Guarantee Fund. In the CSDs Fund each participant's contribution is calculated on a daily basis. This system has proved to be a practical economic benefit to market intermediaries in Macedonia who, under the system, contribute to the Guarantee of Settlement on a daily, pay-as-you-go basis.

What procedures are in place for the processing of corporate action entitlements?

PFMI: Q.11.6.1

AGC: 36

- Credited to the securities account on the day indicated below regardless of whether actually collected by the CSD on the scheduled date.
- Credited to the securities account upon actual receipt by the CSD.
- Corporate action entitlements are handled by an entity separate from the CSD.
- Not applicable
- OTHER: The Payment system (MIPS) of National Bank will be used in cases where the CSD is responsible for distributing money on behalf of Issuers. In the event of the CSD distributing money, the Issuer must place money in a separate CSD account at the NBRM. From the CSD account at the NBRM, the CSD will then send individual payment orders for each holder entitled to payment, to the banks of the holders. After banks have received the money, the banks are responsible for transferring the money to the individual holders accounts. The CSD system automatically sends Transfer Orders to the NBRM when the payments are due (Payment Date). If there are insufficient funds in the CSD account, the entire payment transfer fails. If the payment transfer fails, the transfer has to be re-sent.

Each participant, according to the Article 3. Rules of guarantee fund, is required to contribute 3.500€ to the fund as a flat rate contribution.

With usage of guarantee fund as a risk measure CSD is implicitly guaranteeing settlement in case of cash defaults up to the amount available in the guarantee fund. Participants are fined (around 250€) for cash default and CSD is blocking securities by transfer to the special securities account.

If the cash default is not covered until 14.00 CSD will suspend participant for at least 3 days (maximum 30 days). If the cash default is not covered in the 30 days CSD will sell blocked securities and transfer cash to the guarantee fund.

Rule 17f-7, by reference to Rule 17f-4, requires that, for a CSD to be eligible to hold securities of U.S. registered investment companies (such depositories hereinafter referred to as "Eligible Securities Depositories"), the CSD must be a "system for the central handling of securities where all securities of any particular class or series of any issuer deposited within the system are treated as fungible and may be transferred or pledged by bookkeeping entry without physical delivery of the securities."

Are all securities of a particular class or series of any issuer that are deposited in your institution treated as fungible, and can they be transferred or pledged by bookkeeping entry without physical delivery of the securities?

*PFMI: n/a**AGC: 1*

No

727 G23Q002

Please explain

PFMI: n/a

AGC: 1a

All securities issued in Republic of North Macedonia are dematerialized, and all of them are classified and registered in the CSD under an ISIN number. This allows for the securities to be treated as fungible. One security that is issued by one issuer and that bares the same rights is always issued by unique ISIN. Thus the securities that are issued with the same conditions by one issuer are regarded interchangeable and are not deferring from the others in the series.

728 G23Q003

Rule 17f-7 also requires that an Eligible Securities CSD “acts as or operates a system for the central handling of securities or equivalent book-entries in the country where it is incorporated,” or “acts as or operates a transnational system for the central handling of securities or equivalent book-entries.” Does your institution:

a distributed architecture is implemented to avoid the single point of failure. CSD system consists of several logical and physical divided parts - domains. There are domains for database servers, application servers, workstations. Each domain has its own domain controller, which takes care of users, rights and privileges on that system. Between them there is no domain relation and the firewall is put on each end. The connection between different domains (also different networks) is established through third entity workgroup.
